SUMMARY

Passionate Computer Science and Business Systems undergraduate (2024-2028) focused on full-stack web development, AI, and scalable operational platforms. I enjoy learning modern tech stacks like MERN, Next.js, and FastAPI by building practical, high-impact projects. I have developed end-to-end applications ranging from an emergency medical ecosystem to advanced AI-powered workflow systems. Eager to bring my technical skills, proactive problem-solving, and business understanding to an internship role to grow professionally.

EDUCATION

Bachelors Of Technology (CSBS)	2024 - Present
SSM Institute Of Engineering And Technology, Dindigul	7.8 GPA
Higher Secondary (12th)	2023 - 2024
Arulmigu Palaniandavar Matric Hr Sec School, Palani	70%
Higher Secondary (11th)	2022 - 2023
Arulmigu Palaniandavar Matric Hr Sec School, Palani	72%

SKILLS

Frontend:	HTML, CSS, JavaScript, React, Next.js
Backend & DB:	Node.js, FastAPI, MySQL, Firebase, Supabase, SQLite
Programming:	Java, Python, C, JavaScript
AI Tools & Vibecoding:	Lovable.ai, Gemini, Claude, Gamma AI
Data Science & ML:	Machine Learning, Predictive Analytics, NLP Integration
Tools & Methodologies:	Git, GitHub, VS Code, Arduino UNO
Design & UX:	Figma, Flutter, Blender

PROJECT EXPERIENCE

◆ O.D.I.N., Multi-Agent Business Operating System

- Architected an AI-driven virtual Chief of Staff platform utilizing a 3-tier portal architecture (Apex, Department Node, Worker) to replace manual micro-management with operational clarity.
- Engineered natural language processing (NLP) capabilities for intuitive task logging and implemented predictive bottleneck alerts to proactively manage workflows.
- Modeled complex backend database schemas and multi-tier authentication routing to support seamless, hierarchical multi-agent coordination.

◆ Alloc8, Capacity-Planning & Task-Allocation Platform

- Developed a premium operational workflow platform using React 19 and SQLite to streamline task delegation across a three-tier organizational structure.
- Integrated advanced capacity-planning features including domain-based task auto-suggestion, granular time-logging, and real-time analytics.
- Designed role-specific command centers to eliminate communication silos and provide transparent tracking of workforce productivity and budgets.

◆ B-Link (Blood-Link), Emergency Medical Dispatch Ecosystem

- Engineered a scalable medical logistics platform using Next.js tailored for Tier-2 and Tier-3 cities to optimize emergency response times.
- Developed an automated offline SMS protocol fallback and offline-switching logic to guarantee continuous service in low-connectivity regions.
- Integrated masked privacy bridges to ensure secure communication and built an accessible, dark-mode user interface for medical first responders.

◆ Nilam.ai, Climate-Adaptive Agritech Platform

- Built an offline-first agritech web solution using Next.js, FastAPI, SQLite, and Prisma ORM to provide satellite weather tracking and subsidy matching.
- Implemented an emergency SMS broadcasting infrastructure to deliver critical weather alerts directly to rural farmers' mobile devices.

◆ Fingenzai, AI-Powered Financial Advisor

- Architected an AI-driven financial advisory application tailored for Gen Z to autonomously track, analyze, and supervise personal monetary exposure.
- Integrated intelligent processing algorithms to analyze spending patterns and deliver real-time, personalized financial insights within a centralized platform.

◆ Aurenz Fashions, E-Commerce Storefront

- Developed a responsive e-commerce web application leveraging HTML, CSS, JavaScript, and a robust Firebase backend architecture.
- Built administrative control panels for real-time data reflection, inventory management, and seamless administrative control.

LANGUAGES

English, Tamil

CERTIFICATIONS

- Certified Full Stack Developer: Full Stack Web Development Bootcamp, SSMIET
- Machine Learning Foundation Certification: Infosys
- Amazon ML Summer School: Amazon
- Responsive Web Design: FreeCodeCamp
- Introduction to Git and GitHub: Coursera
- Introduction to Data Science and Analytics: Coursera
- Python Foundation Certification: Infosys
- Figma Certification: Infosys
